

ROTATOR

Rotator 480HD

The Rotator is powered by 56 kW (75 hp) Deutz diesel engine and features a variable speed hydrostatic drive with 12 forward speeds. Self cleaning integrated dust collection system with automated debris dump simplifies operation. Extra heavy duty non marking tires. A compact, multi-purpose design with quick change tooling packages including shot blast, flail grind, diamond shave and grinding/polishing attachments.

Impacts S600HD

The Impacts S600HD attachment features a full floatation design which allows the blast head to glide over the work surface without operator intervention. The dual blast wheel design is powered by a powerful hydraulic motor. All machine functions are controlled from operator station. Blast wheel speed indicator and wheel load indicator.
